

SAMPLE CLAIM SURVEY NOTE

Fictional document for internal demonstration use only

Contract No.	FA20250000000004
Claim No.	FACLM-2026-001
Insured	Pacific Semiconductor Co., Ltd.
Location	Maharashtra, India
Class of Business	Marine Cargo
Date of Loss	12 June 2026
Cause of Loss	Water Damage during Inland Transit
Sum Insured	KRW 1,986.9 billion
Premium	KRW 6.3 billion
Gross Estimate	KRW 3.8 billion
Paid	KRW 1.2 billion
Outstanding	KRW 2.6 billion

Loss Overview

A hypothetical cargo claim is assumed to have arisen from heavy monsoon rainfall during inland transit of packaged semiconductor components from a temporary storage site in Maharashtra to the export consolidation point. Water is reported to have entered the carrying vehicle following tarpaulin failure and pooling on the trailer bed, resulting in moisture damage to several pallets of high-value electronic goods.

Preliminary Findings

Initial information suggests that the affected cargo suffered corrosion risk and loss of usability due to water ingress. Emergency segregation and inspection were reportedly undertaken upon arrival. On the basis of the documents assumed to be available, the present gross loss is estimated at KRW 3.8 billion, of which KRW 1.2 billion is treated as paid on account and KRW 2.6 billion remains outstanding pending adjustment, salvage review, and final quantum agreement.

Coverage View & Recommendation

Subject to the full policy wording, the loss would ordinarily be reviewed under the marine cargo transit cover, with particular attention to packing adequacy, conveyance condition, wet damage provisions, deductible, and recovery potential against carriers or logistics operators. It is recommended that survey photographs, packing records, carrier incident statements, and a detailed inventory valuation be obtained before final settlement.
